DETAILED ACTION

Examiner's Question

The examiner requests a response to the following question:

The examiner wants to make the applicants aware of 11/089276; this application has similar subject matter but assigned to a different company and there are no common inventors. The examiner wishes to enquire if there is a special relationship between these applications (e.g., Is the instant invention a result of a joint research agreement?) or are these two independent unrelated applications?

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-17, drawn to a composition.

Group II, claims 18-20, drawn to process of preparing the composition.

Group III, claim 22, drawn to process of using the composition.

The special technical feature interconnecting the instant claims is the combination of:

- (a) a hydrophilic polymer of dendritic structure, and
- (b) a water-insoluble phosphate.

The examiner takes the position the restriction requirement is proper as lack of unity can be established *a posteriori* from reference Tomalia *et alli* (US 2001/0011109 A1), which teaches "nanocomposites of dendritic polymers." In paragraph 108, Tomalia *et alli* teaches swelling a dendritic polymer with solvent and adding this mixture to a solution containing metal phosphates.

All metal phosphates, except alkali metal phosphates, are water soluble. See Moore *et alli*. Chemistry: The Molecular Science, 1st Ed. Brooks/Cole Publishing, p. 164, tbl. 5.1. Therefore, one would immediately envision water-insoluble metal phosphates.

As claim 1 is the commonality in the instant claims, and as it is non-novel, lack of unity has been established.

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

A telephone call was made to Mr. James Napoli on June 2, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
